ARCHITEKTURE

We help to bring a unique character and identity into your home, office or any functional interior spaces.

RESIDENTIAL HOUSE

As a team of architects and designers, we are uniquely qualified to translate your property vision into visuals that will transport homebuyers and investors alike.

ABOUT US

VALETAK LEVKAR studio was founded in 2013 by graduates of the architectural institute who felt the strength and energy in themselves to start their own business. Initially, orders were executed for acquaintances, and customers also came on the recommendation of friends.

We create and turn info reality

To form a team dedicated to providing exceptional customer service. We will provide a professional approach to constructing exceptional quality projects which meet budget and schedule goals.

Construction services

Our customers love the pace/quality tempo that we show during each of the principal construction processes!

SPECIALIZATION

For almost ten years we have been working on the development of residential and commercial projects. We develop individual houses, small architectural forms, design public spaces and do interior design.

FLEXIBILITY

We provide professional support to clients at all stages of design and protection of investments in construction - from pre-project analysis and initial sketches to design estimates, passing approvals, expertise and the implementation process.

Interiors aren't just spaces

We believe in layering bold patterns and textures with classic materials, tailoring them in modern ways to create timeless designs.

Interiors aren't just spaces

We believe in layering bold patterns and textures with classic materials, tailoring them in modern ways to create timeless designs.

CREATION OF SPACE

We strive to create beautiful and comfortable spaces that touch on the past, exist in the present, and gravitate towards the future. We pride ourselves on efficiency, while respecting budgetary restrictions, functional needs and aesthetics.

Interiors aren't just spaces

We believe in layering bold patterns and textures with classic materials, tailoring them in modern ways to create timeless designs.

COLOR AND TEXTURE

Color and texture are essential elements of design; they add personality and just the right amount of zest to create your own distinct creation. They help define a space while influencing our moods and behaviors. Designers use these elements to create contrast and depth, express emotion, and to create rich sensory experiences that stimulate our collective senses.

Interiors aren't just spaces

We believe in layering bold patterns and textures with classic materials, tailoring them in modern ways to create timeless designs.

COMMERCIAL INTERIOR

While residential interior designers focus on homes, commercial interior designers conceptualize spaces for businesses. This would include hotels and lounges, restaurants and retail spaces, offices, banks, theaters, hospitals and examination rooms, libraries, schools, country clubs, spas, shopping malls, and everything in between.

COLLABORATION

We believe great design begins with a great team. Throughout our years of experience, we've built a strong foundation with contractors, architects, millworkers, and artisans who we feel confident working with to make our drawings and details come alive.

Interiors aren't just spaces

We believe your spaces should grab their end-users making them want to come back for more. We believe your home should speak to your history, personal experience, and emotions.

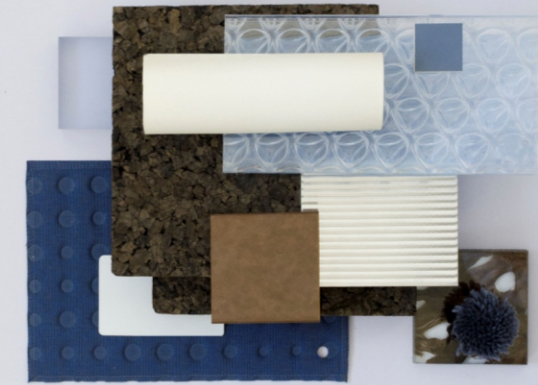

Interiors aren't just spaces

We believe your spaces should grab their end-users making them want to come back for more. We believe your home should speak to your history, personal experience, and emotions.

FUNCTIONALITY

There are a few technical details that are important when creating a home that is functional. Every room must have a focal point. Some rooms will naturally have ones like a fireplace or a full-length window, however, in other rooms, this needs to be created. The eye wants to be attracted to one point from which it can then make sense of the rest of the room. If every chair is a statement chair, a viewer will get confused and have no idea where to rest their eyes. We suggest using an interesting sofa, bed, table or shelf, a bright rug or even a unique piece of artwork to create a focal point for your room.

MATERIALS SELECTION

Finish materials such as tile, hardwood floors, marble, stone, woods and wallcoverings can be alluring with their endless array of styles and options. However, when you select multiple dissimilar styles or don't know how to blend them properly, the result can be a mismatched, hodgepodge appearance. VALETAR LEVKAR studio views these materials like the layers of a cake, providing the foundation of your environment. While you may want to pick paint colors first, be aware that there are millions of paint colors to choose from, but you may only find ten tile selections that you like.

Interiors aren't just spaces

We believe in layering bold patterns and textures with classic materials, tailoring them in modern ways to create timeless designs.
