

**OpenVPN tunnel
(TCP/UDP)**

The diagram illustrates the OpenVPN tunnel architecture. On the left, a green rounded rectangle represents the 'OpenVPN tunnel (TCP/UDP)'. Two horizontal channels extend from this tunnel to the right. The top channel is orange and labeled 'Control channel'. The bottom channel is blue and labeled 'Data channel'. On the right, a gray rectangle represents the 'Multiplexer Demultiplexer'. The channels connect the tunnel to this component, indicating the flow of control and data packets.
