## PREFACE

The proceedings contain 56 conference papers presented at the 37th conference **Computational Mechanics 2022**, which was held at the Hotel Srní in Srní, Czech Republic, on November 7 – 9, 2022. This annual conference, which was attended by nearly eighty participants from the Czech Republic, Slovakia and from abroad, was organised by the Department of Mechanics, Faculty of Applied Sciences of the University of West Bohemia under the auspices of

- Miloš Železný, the Dean of the Faculty of Applied Sciences,
- Rudolf Špoták, the President of the Pilsen Region,
- Czech Society for Mechanics,
- Czech National Committee of IFToMM,
- Central European Association for Computational Mechanics.

The main objective of this traditional conference is to bring together academicians, researchers and industrial partners interested in relevant disciplines of mechanics including

- solid mechanics,
- dynamics of mechanical systems,
- mechatronics and vibrations,
- reliability and durability of structures,
- fracture mechanics,
- mechanics in civil engineering,
- fluid mechanics and fluid-structure interaction,
- thermodynamics,
- biomechanics,
- heterogeneous media and multiscale problems,
- experimental methods in mechanics,

to create an opportunity for meeting, discussion and collaboration among the participants. As in the previous years, the three best papers presented at this conference were awarded the Czech Society for Mechanics Award for young researchers under 35 years of age.

To all conference participants, we offer the possibility to publish their peer-reviewed full papers in the international journal **Applied and Computational Mechanics** indexed by Scopus. This journal has been published by the University of West Bohemia since 2007 (see <https://www.kme.zcu.cz/acm/>).

We would like to express our gratitude to all the invited speakers for their significant contribution to the conference and the time and effort they put. Considerable acknowledgement belongs also to the members of the Organising Committee for their important work.

We strongly believe that all participants of the CM2022 enjoyed their stay in the beautiful nature of the Šumava region in a meaningful way. Finally, we would like to invite you all to come to the next conference CM2023.

**Jan Vimmr**  
University of West Bohemia  
Chairman of the Scientific  
Committee

**Vítězslav Adámek**  
University of West Bohemia  
Chairman of the Organising  
Committee

## SCIENTIFIC COMMITTEE

### Chairman:

Jan Vimmr

University of West Bohemia, Faculty of Applied Sciences, Czech Republic

### Members:

Miroslav Balda

Research and Testing Institute Plzeň, Czech Republic

Jiří Burša

Brno University of Technology, Faculty of Mechanical Engineering, Czech Republic

Jan Dupal

University of West Bohemia, Faculty of Applied Sciences, Czech Republic

Václav Dvořák

Technical University of Liberec, Faculty of Mechanical Engineering, Czech Republic

Jiří Fürst

Czech Technical University in Prague, Faculty of Mechanical Engineering, Czech Republic

Miroslav Holeček

University of West Bohemia, Czech Republic

Jaromír Horáček

Institute of Thermomechanics, Czech Academy of Sciences, Czech Republic

Michal Kotoul

Brno University of Technology, Faculty of Mechanical Engineering, Czech Republic

Jiří Křen

University of West Bohemia, Faculty of Applied Sciences, Czech Republic

Vladislav Laš

University of West Bohemia, Faculty of Applied Sciences, Czech Republic

Justín Murín

Slovak University of Technology in Bratislava, Faculty of Mechanical Engineering, Slovak Republic

Milan Naď

Slovak University of Technology in Bratislava, Faculty of Materials Science and Technology in Trnava, Slovak Republic

Jiří Náprstek

Institute of Theoretical and Applied Mechanics, Czech Academy of Sciences, Czech Republic

Miloslav Okrouhlík

Institute of Thermomechanics, Czech Academy of Sciences, Czech Republic

Luděk Pešek

Institute of Thermomechanics, Czech Academy of Sciences, Czech Republic

Jindřich Petruška

Brno University of Technology, Faculty of Mechanical Engineering, Czech Republic

Jiří Plešek

Institute of Thermomechanics, Czech Academy of Sciences, Czech Republic

František Pochylý

Brno University of Technology, Faculty of Mechanical Engineering, Czech Republic

Pavel Polach

Research and Testing Institute Plzeň, Czech Republic

Eduard Rohan

University of West Bohemia, Faculty of Applied Sciences, Czech Republic

Josef Rosenberg

University of West Bohemia, Faculty of Applied Sciences, Czech Republic

Milan Růžička

Czech Technical University in Prague, Faculty of Mechanical Engineering, Czech Republic

Milan Sága

University of Žilina, Faculty of Mechanical Engineering, Slovak Republic

Petr Sváček

Czech Technical University in Prague, Faculty of Mechanical Engineering, Czech Republic

Zbyněk Šika

Czech Technical University in Prague, Faculty of Mechanical Engineering, Czech Republic

Michael Valášek

Czech Technical University in Prague, Faculty of Mechanical Engineering, Czech Republic

Jaroslav Zapoměl

VŠB – Technical University of Ostrava, Faculty of Mechanical Engineering, Czech Republic

Vladimír Zeman

University of West Bohemia, Faculty of Applied Sciences, Czech Republic

## Table of Contents

Balon A., Beneš P., Šika Z.: <i>Model reduction in aeroservoelasticity</i> . . . . .	1
Bělohoubek M., Hajžman M., Vimmr J.: <i>Assessment of various computational approaches for airfoil stability analysis with two degrees of freedom</i> . . . . .	3
Boualleg A., Cirkl D.: <i>Mechanical properties of 3D printed composite material</i> . . . . .	7
Bublík O.: <i>Solution of incompressible viscid fluid flow using a physical informed neural network</i> . . . . .	10
Bulín R., Hajžman M., Byrtus M.: <i>Modelling of gear couplings in the framework of multibody systems</i> . . . . .	12
Čečrdle J.: <i>Supplementary aeroelastic analysis of modified LSA-category aircraft</i> . . . . .	14
Clément J.-B.: <i>p-Adaptive simulations of Richards' equation with discontinuous Galerkin method</i> . . . . .	18
Dupal J.: <i>Periodical solution of n-DOF parametric system vibration</i> . . . . .	22
Dyk Š., Rendl J., Bulín R., Smolík L.: <i>Local phenomena in tilting-pad journal bearing's pivot</i> . . . . .	24
Goga V., Berta Š., Murín J., Paulech J., Šarkán L.: <i>Device for measuring the stiffness of the tensile nylon springs</i> . . . . .	26
Hajžman M., Polach P., Polcar P.: <i>Multibody dynamics simulations of the railway vehicle for heavy loads transport</i> . . . . .	30
Houdek V., Verlinden O., Hajžman M.: <i>Non-uniform quaternion spline interpolation in vehicle kinematics</i> . . . . .	34
Jánošík T., Brož F.: <i>Optimization of a ducted-fan propulsion unit equipped with an internal combustion engine</i> . . . . .	38
Ježek O., Kopačka J., Gabriel D.: <i>Post-processing the results of the topology optimization with the level-set technique</i> . . . . .	42
Klesa J., Fukuchi M.: <i>The comparison of real gas and ideal gas models for compressor design</i> . . . . .	46
Kovář P., Fürst J.: <i>Compressor cascade total pressure loss correlation modelling at design points using artificial neural networks</i> . . . . .	50
Kraus K., Šika Z., Krivošej J.: <i>Experimental based tuning of active 3-DoF planar absorber</i> . . . . .	54
Krivošej J., Halamka V., Šika Z.: <i>Pre-stress states and controllability of spatial cable-driven mechanisms</i> . . . . .	56
Krivošej J., Šika Z.: <i>Eigenmotion concept of cable driven mechanism with absorbing elements</i> . . . . .	59
Lieskovský J., Beneš P., Šika Z.: <i>Inverse dynamics approximation for controlling mechanisms with flexible elements</i> . . . . .	61

Lukeš V., Rohan E.: <i>Two-scale numerical simulation of acoustic transmission in interaction with flow</i> . . . . .	63
Majko J., Vaško M., Handrik M., Sága M.: <i>Tensile testing of polymer composites reinforced with continuous fibers produced by CFF method</i> . . . . .	66
Minich R., Kepka jr. M., Kepka M.: <i>Assessment of the fatigue life of a city bus</i> . . . . .	70
Murín J., Kugler S., Aminbaghai M., Paulech J., Hrabovský J., Goga V., Kutiš V.: <i>Kinematic and constitutive equations in warping torsion of FGMs beams with spatially varying material properties</i> . . . . .	72
Musil J.: <i>On the development of Cahn-Hilliard Navier-Stokes numerical solver within OpenFOAM framework</i> . . . . .	75
Nađ M., Rolník L., Bucha P.: <i>The numerical analysis of cantilever beam structures filled using aluminium foam</i> . . . . .	79
Náprstek J., Fischer C.: <i>Analysis of van der Pol equation on slow time scale for combined random and harmonic excitation</i> . . . . .	83
Náprstek J., Fischer C.: <i>Construction of the Lyapunov function reflecting the physical properties of the model</i> . . . . .	87
Otta J., Šudoma M.: <i>EMA-driven model updating based on material homogenization</i> . . . . .	91
Padovec Z., Vondráček D., Mareš T.: <i>Stress analysis in filament wounded composite pressure vessels</i> . . . . .	95
Papáček Š., Polach P., Prokýšek R., Anderle M.: <i>On a class of biped underactuated robot models with upper body: Sensitivity analysis of the walking performance</i> . . . . .	99
Pařez J., Kovář P., Vampola T.: <i>Sensitivity analysis of thermodynamical parameters on the thermal bowed rotor using 2D finite element model</i> . . . . .	103
Paulec M., Kopas P., Sága M.: <i>Effects of hardenability on mechanical properties of tool steel 56NiCrMoV7 for forging die</i> . . . . .	107
Pawlik V., Steinbauer P., Bukovský I.: <i>Online identification using linear neural unit with guaranteed weights convergence</i> . . . . .	111
Pešek L., Šnábl P., Prasad C.S., Delanney Y.: <i>Numerical simulations of aeroelastic instabilities in turbine blade cascade by modified Van der Pol model at running excitation</i> . . . . .	115
Rendl J., Smolík L., Dyk Š., Bulín R., Kubín Z.: <i>Treatise on dynamic behaviour modelling of tilting pad journal bearing under operating conditions: From the real world to numerical simulations</i> . . . . .	119
Rohan E., Heczko J.: <i>Homogenization based two-scale modelling of unilateral contact in micropores of fluid saturated porous media</i> . . . . .	122
Rohan E., Moravcová F.: <i>Analytical and numerical methods for modelling of acoustic streaming in homogenized rigid porous structures</i> . . . . .	126

Sapietová A., Dekýš V., Šavrnoch Z.: <i>Analysis of production parameters of automotive components by injection moulding technology</i> . . . . .	129
Šika Z., Gregor J., Krivošej J., Vyhlídal T.: <i>Spatial active absorber for non-located vibration suppression</i> . . . . .	133
Šindel T., Šika Z., Zavřel J.: <i>Active vibration suppression synthesis of mechanisms with tensegrity properties</i> . . . . .	135
Škoda J., Círk D., Luciová A.: <i>Finite element model of interaction of human body and seat with variable stiffness</i> . . . . .	139
Smolík L., Bulín R., Hajžman M., Byrtus M., Rendl J.: <i>Vibration analysis of a vertical rotor immersed in fluid at extreme operating temperatures</i> . . . . .	141
Šnábl P., Pešek L., Prasad C. S., Chindada S.: <i>Problematics of aerodynamic damping calculation from measured data of 5-blade cascade</i> . . . . .	145
Štorkán J., Vampola T.: <i>Vocal tract acoustic modelling using FEM with specific element</i> . . . . .	147
Šulda J., Kroft R., Adámek V.: <i>Identification of dispersion and attenuation curves of thin non-prismatic heterogeneous viscoelastic rods</i> . . . . .	151
Sváček P.: <i>On algebraic flux corrections for finite element approximation of transport phenomena</i> . . . . .	155
Timorian S., Valášek M.: <i>Dual frequency vibration absorber</i> . . . . .	159
Valášek J., Sváček P.: <i>On comparison of suitable interpolations for finite element meshes respecting physical laws</i> . . . . .	161
Vaško M., Majko J., Handrik M., Vaško A., Sága M.: <i>Notch and load direction influence on impact toughness of composites reinforced with long fibers produced by 3D printing</i> . . . . .	165
Vomáčko V., Šulc M.: <i>Cruciform biaxial tests of FRP: Influence of tabs thickness</i> . . . . .	169
Vořechovský M.: <i>Failure probability estimation of functions with binary outcomes via adaptive sequential sampling</i> . . . . .	173
Žák J., Ezenwankwo J.: <i>Problematic of composite materials with woven reinforcement</i> . . . . .	175
Zámečníková T., Mareš T., Padovec Z., Malá A., Kropík B., Vondráček D.: <i>Determination of the equivalent stiffness of thick-walled composite beams with an inter-circular cross-section using the semi-analytical method</i> . . . . .	179
Zapoměl J., Kozánek J., Košina J., Cibulka J.: <i>Study of the oscillation of a pendulum in a magnetic field</i> . . . . .	183
Zeman V., Hlaváč Z., Dyk Š.: <i>Modal synthesis method for vibration analyses of damped mechanical systems</i> . . . . .	187
